

ORIENTATION DAY

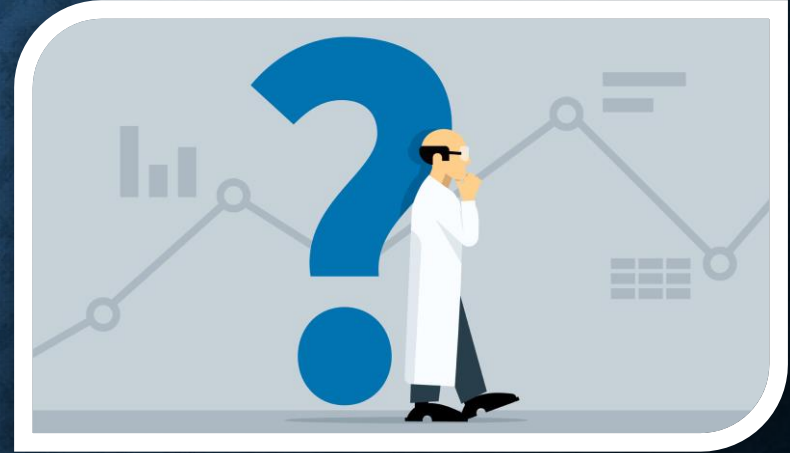

WELCOME TO JUMP

- Welcome to the JUMP Team!
- JUMP is built to aid you, through a mentorship approach, in growing your technical and business skills.
- Partnering together to help *jump* your career with one of our clients!

KICKING IT OFF...

- What are you looking to get out of this training?
- What are your expectations?

AGENDA

- Syllabus and Topics Covered
- Expectations and Previous Classes
- Meeting Your Instructor
- Clients and Business Training
- Outings and Dress Attire
- Computer Set Up and Downloads
- Q&A and Wrapping Up

SYLLABUS AND TOPICS COVERED

LEARNING OUTLINE

- We will learn through:
 - Presentations
 - Hands – on Coding
 - Daily Assignments
 - Bi-Weekly Projects
 - Group and Individual
 - Assessments

OUTLINE OF THE COURSE

- The course is built to start at the ground level and build upon our learning week over week!
 - First 2 weeks are Introduction to Programming
 - Java core concepts
 - Classes and Objects
 - Flow of Control
 - Strings and Arrays
 - Packages
 - Interfaces and Abstract Classes

OUTLINE OF THE COURSE CONTINUED

- Our 3rd week dives into Advanced Java topics
 - We will also have our first assessment at the end of the 3rd week.
 - We do also have weekly office hours times set up to arrange one on one time with the instructor.
- The 4th week is spent on SQL and JDBC

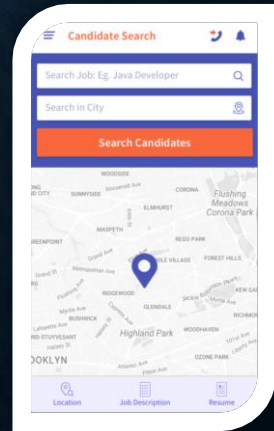

OUTLINE OF THE COURSE CONTINUED

- The 5th week comes JEE, JAX, and REST Web Services
- Week 6 is on MongoDB and Rabbit MQ
- Weeks 7 – 9 are on Spring Framework
- Week 10 and 11 cover Angular and React
- Week 12 is on your Capstone Project
 - Let's take a deeper dive into the technologies!

LIVE PROJECTS

- Partnering up with ClikSource, one of our subsidiary companies, we will have a live project to work on from the 10th week onwards.
 - These projects will focus on Angular.
 - Our head of ClickSource sits in the Basking Ridge office.
 - You'll receive presentations on it and hands on help.
 - Be able to put it on your resume as an additional live project!

MEETING YOUR INSTRUCTOR

CAREER OF REYNALD ADOLPHE

- Reynald has 10+ years experience in web site consulting and development:
 - Author for Lynda.com
 - Software Engineer for: Logix Federal Credit Union, Prestige Artists, and Tribune Company
 - Web Application Developer for: Risettime Consulting and Inforte
 - Enterprise Developer/Consultant: Accenture and Anderson Consulting

A LOOK AT MATERIAL

MATERIAL PREVIEW

14

CLIENTS AND BUSINESS TRAINING

TAKE A LOOK AT SOME OF OUR TOP CLIENTS

- As we have talked about during your process to get here, Collabera has partnered with over 1,600 clients and placed nearly 130,000 consultants with those companies in it's history.
- Let's see some of the clients we work with and how many people we have on site currently:

- IBM – 616 Teammates
- Accenture – 527 Teammates
- Wells Fargo – 508 Teammates
- Bank of America – 345 Teammates
- Uber – 360 Teammates
- Around 150 – 200 Folks each with Microsoft, Capital One, Citi, Nationwide and Amazon

EACH CLIENT IS DIFFERENT

- It is great to have such strong partnerships and because we know the clients well, we know that each of them has their own way of interviewing, own environment, and own manager personality!
- To best prepare you for all these unique features we will combine industry knowledge training with real hands on experiences from our sales team who interact with and at the client frequently.

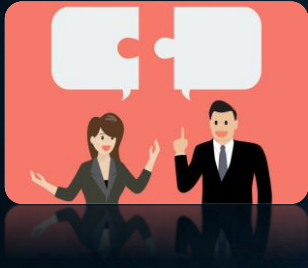

BUSINESS TRAININGS

- We will be spending time preparing for interviews and learning best practices to help lock down an opportunity and succeed in an office setting.
 - Interview Preparation
 - Resume Formatting
 - Email Best Practices
 - Work Place Etiquette
 - Dress for Success
 - Navigating Workplace Politics
 - Working in Teams
 - Creating a Personal Brand

INSIDE INFORMATION

- One of the most impactful areas of the business training is interacting with our sales teams.
- Our sales teams spend their time onsite and meeting with managers at the client site.
 - This rapport and knowledge that is built will be shared with you.
- As you start to interview with companies, we will bring in the account manager associated with that client to give you details on:

- Culture and environment
- The way a hiring manager conducts an interview
- The personality of a hiring manager and others you meet during an interview

COMPUTER SET UP AND DOWNLOADS

YOUR COMPUTER – THE BASICS

- Since you are bringing your own computer to the training, take a look at the system requirements which is needed for the class.

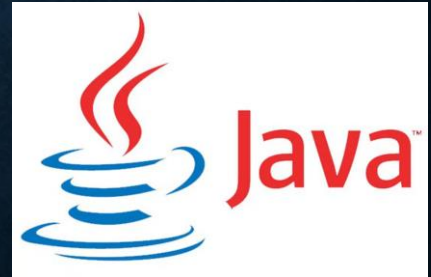

Spring Tool Suite (Eclipse): <https://spring.io/tools>

Java jdk 11:

<https://www.oracle.com/technetwork/java/javase/downloads/jdk11-downloads-5066655.html>

xampp: <https://www.apachefriends.org/index.html>

Node js: <https://nodejs.org/en/>

YOUR COMPUTER – TRAINER REQUESTS

- To get the most out of the class, the trainer for this program has requested that the below downloads are also included:

Visual Studio Code: <https://code.visualstudio.com/>

Git: <https://git-scm.com/downloads>

mongoDB: <https://www.mongodb.com/>

mysql: <https://dev.mysql.com/downloads/mysql/>

mysql workbench: <https://dev.mysql.com/downloads/workbench/>

Postman: <https://www.getpostman.com/>

22

YOUR COMPUTER – ADDITIONAL SUPPORT

- If you want to test your knowledge more or look up certifications the below links help:
 - https://education.oracle.com/java/java-se/product_267?certPage=true
 - <https://www.katacoda.com/>

WRAPPING UP WITH Q&A

QUESTIONS AND ANSWERS

- Before we wrap up for today, what questions do you have about the program starting next week?
